

I am taking the time to say that Air 1 is a very important radio station to me. This station provides the Christian music that I like when there would be none if it were not for this station. If the station was replaced by the LPFM system the community would not have a good wholesome source of programming to turn to. I believe that the air 1 station is a public service because it provides a family station with good music and no commercials when there is nothing wholesome on the other stations. Please do not replace the stations with the LPFM system.

Sincerely,  
Jessica Price
